Subjects and Predicates

Time and the Tide

One hundred years ago, in an excess of religious zeal, Middlebury changed the time for morning chapel from 5:30 to 5:00. For entirely different reasons, the day's work begins in this year of academic acceleration, 1942, at 7:45 instead of 8:00.

With luncheon advanced fifteen minutes to 12:25 and afternoon classes beginning at 1:00 instead of 1:30, a whole period has thus been added to the day. All classrooms are emptied by 4:00 and the next 105 minutes are devoted to physical education.

The purpose is two-fold. The war effort needs scientists. The war effort stresses physical fitness. One three-hour laboratory period is infinitely more efficient than the formal calisthenics, say the scientists, than the same amount of time divided into several sessions. Competitive sports are infinitely more productive of muscles and morale than formal calisthenics, say the military men.

By adroit manipulation of the clock-hands, Middlebury now stands ready to satisfy them all. Laboratory periods from one to four are followed by enough sinew-stretching and body-building to rival the playing fields of Eton—and their purpose.

Middlebury Merry-Go-Round

This issue should be the newliest letter you ever received if it can cover all there is to tell. A while ago we expansively admitted that Middlebury was no ivory tower. Now we wonder at our former restraint: it's a giddy carousel. And anybody who can snatch a brass ring at this pace is welcome to another ride when the next war starts.

One preliminary observation. Gold-en-lining seekers have remarked upon war's consolidating effects in the nation, the community, the home. Although they cannot bless the tie, they hail the binding. We offer as a model for their contention Middlebury College, where remaining members draw closer to fill in each succeeding gap, shoulde the burdens of the departed, forget the bickerings of peaceful years in comradeship against a common menace.

And now let the calliope sound.

American Literature. Professor Cook returns after a year's leave spent mainly in West Coast libraries . . . Howard M. Munford, '34, (1941) remains as instructor.

Chemistry. Associate Professor Haller (1925), after receiving his Ph.D. from Cornell in August, resigns to accept a position in charge of research at the new magnesium war plant of the Mathieson Alkali Company at Lake Charles, La . . . There are two new appointments: Ray T. Wendland, B.S. Carleton College, Ph.D. Iowa State College, who has been working this summer as research chemist at the Institute of Popular Chemistry in Appleton, Wis., after several years of industrial chemistry and teaching at Coe College; and Bruce V. Weidner, B.S. and Ph.D. Pennsylvania State College, former instructor at Penn State undergraduate centers, who comes to Middlebury from the University of Alaska . . . James S. Coles, Ph.D. (1941) is promoted to an assistant professorship.

Classics. Professor Dame is on a year's leave . . . Professor White carries on alone in both Latin and Greek besides teaching ancient history, serving as Dean of the faculty, chairman of the curriculum committee, and chief adviser.

Contemporary Civilization. Pierre de Lannut, for ten years head of the Paris office of the League of Nations and lately connected with the OWI in New York, takes over the department as associate professor. He was CBS news commentator from France before the outbreak of the present war and until the fall of France headed the North American division of the French Office of Information. Visiting professor at the French School in 1936, 1939, and 1940, he received an honorary L.H.D. from the College this summer. He will teach at Middlebury between Monday and Thursday to keep weekend lecture appointments in New York . . . Robert Davis, instructor in Biblical literature and in charge of daily chapel services, will correct the reading reports for the course.

Drama. This department becomes pro tem a division of English, with Erie T. Volkert (1941) promoted to assistant professor in charge of all instruction and student thespian enterprises. V. Spencer Goodreds (1928) after a year's leave goes into an administrative position in the Pennsylvania State College extension service.

Economics. Professors Fife and Prentice (on leave first semester) are also teaching history courses related to their economic fields . . . A trial collaboration with the Political Science department last semester proved so effective that the course in Government Regulation in Peace and War conducted jointly by Instructor Kurt Petshek (1941) and Assistant Professor Rafuse (1941), now head of Political Science, is being offered again next semester.

English. After promotion to a professorship, Harry G. Owen leaves the department, the deanship of Bread Loaf, Dr. Freeman's advisory cabinet, the chair of the committee on graduate work, for hush-hush military service.
His courses in English and Fine Arts will not be given this year ... Boylston Green (1941) has been made an assistant professor and is giving a new course in Narrative Poetry.

Franchi. Associate Professor Bourdier is in charge of advising and registration ... Dr. Freeman continues to teach as much as his schedule will permit.

Mathematics. Associate Professor Bowker (1926) heads the department ... Donald Ballou, A.B. Yale, Ph.D. Harvard, came from the Georgia School of Technology in June to teach in the Summer Science Session and continues as assistant professor. His wife is Dorothy Pollard, '29 ... Miss Wiley (1923) leaves the department to become College Statistician.

Physical Education. Coach Beck (1928) has resigned ... Sam Guaraccia, '30, freshman coach for the past three years, replaces him as Panther-tamer, while continuing to teach Italian and Spanish; Coach Brown takes over basketball in addition to track and cross-country; Leslie Fraser, Country Club pro, golf ... With Akerstrom in the Coast Guard, "Dud" Phinney, '37, will divide his time between the high school and college hockey squads ... Dick Field, who has played pro football in Connecticut and coached three years at the Cheshire School, reported as line coach at football camp Sept. 1 ... Randy Hoffmann, '37, guard with the invincibles of 1936, takes charge of the football jayvees ... With baseball doomed for the duration, "Red" Kelly, '31, takes charge of most of the physical training classes and supervises the intramural program ... Miss Sweeney (1941) has joined the WAVES and Mrs. W. Storrs Lee, B.S. University of California, becomes instructor of Physical Education for Women. Mrs. Lee taught hygiene and coached in the Sonora High School in California, studied dancing in Germany under Mary Wigman before becoming the wife of the editor of the Middlebury College Press. She spent the past summer in Colorado studying the dance with Hanya Holm ... Emelie M. Perkins, M.D., of Rutland will continue lecturing on public health and Miss Gibson on nutrition in a war course introduced by the department last semester.

Physics. Pierce G. Couperus, '37, (1941) resigns to accept a position with the National Defense Research Committee's Underwater Sound Laboratory at Harvard ... In his place comes Kendall P. Thomas, '34, who has been teaching physics at Amherst (Mass.) high school, and taking education courses at Mass. State. Since graduation he has taught physics in Springfield, Vt., Pinkerton Academy, and Brown University; studied chemistry at Harvard and physics at Brown.

Political Science. Assistant Professor Lardner (1938), department head since the departure of Major Bogart, resigns to teach at his alma mater, Northwestern ... Robert W. Rafuse (1941) becomes assistant professor and department head ... M. de Lanux teaches the course in International Politics.

Psychology and Education. With Professor Adams (1923) turned emeritus, Professor Howard scheduled for second semester leave, and Assistant Professor Madden slated for military service, things looked pretty bleak here until Professor Sholes and Assistant Professor Weiler from Sociology and Assistant Professor Andrews from Philosophy stepped in to lend a hand. Mr. Andrews teaches a General Psychology section, Mr. Sholes, Social Psychology and Educational Psychology, and Mr. Weiler, the History of Education. If Mr. Madden leaves, a new appointment will be made.

Spanish and Italian. After a strenuous summer as Dean of the mushrooming Spanish School, Professor Centeno finds that he must rest at least the first semester because of poor health ... Associate Professor Rose Martin (1928), scheduled for leave second semester, will act in his stead ... To the department from Chile comes Sra. Marta Vergara de Chamulies, who was European correspondent of a Chilean newspaper from 1927 to 1933, official delegate to the League of Nations in 1932-33, and for the past three years official delegate to the Pan American Union's Inter-American Commission of Women. She has written numerous articles for South American publications. While at Middlebury, she will take several courses in the division of Social Studies, write on aspects of American culture for Chilean newspapers. Mrs. Samuel B. Longwell is also teaching in the department, and a third appointment awaits the clearing of visa permits.

Ground School

Every eight weeks Midd feathers twenty fledglings, ten for the Army and ten for the Navy, in the strenuous C.P.T. program which got under way July 20. The army men are headed for glider service; the naval recruits work under the V-5 plan. South Starr has been turned into a barracks and the recruits are daily shuttled between the campus and the Bristol airport, between classes in civil air regulations, math, navigation, physics, meteorology, aircraft identification, and code, and in the flying and servicing of planes. Under the general direction of Prof. Bowker, the ground school staff includes Professors Ballou, A. M. and R. L. Brown, Kelly, Macfarlane, Swett, Wissler, and Womack. Dr. H. I. Slocum teaches the course in military science and Chief Instructor Rock and Flight Instructors Travis take over at the airport. No undergraduates are allowed in the cockpits for the duration.
Continued

The Merry-go-round still goes 'round, but this time we turn with the management.

Jordan R. Scobie, Litt. B. Princeton, with the Business Manager's Office since 1934 as mortgage and purchasing agent, succeeds Miss Jennie Bristol as Registrar. His former jobs have been divided among the remaining members of the B.M.O. . . . The Registrar's Office will henceforth maintain the academic records of all Midd summer schools.

Marion Wolcott, '25, formerly teacher of French in a South Orange high school, is the new Social Director and Vocational Counsellor of the Women's College and House Director at Forest Hall. She also heads the Women's Council on War Service opportunities, assisted by Miss Knapp and Mrs. Munford.

Randall Hoffmann, '37, A.M. Boston University, has been made Assistant Director of Admissions, in charge of the school and college relations work and the men's Placement Bureau. He comes from Northeastern University where he has been teaching English. As an undergraduate he majored in philosophy, joined Chi Psi, edited the Saxonian, published in the Shield, and was president of his class and Waubanakee, made his "M" in track and football, won the K.D.R. cup, a Bread Loaf scholarship, the 1937 Winter Carnival crown. His wife was Elizabeth G. Brown, '34.

The new college nurse is Miss Lena Hood, R.N., a graduate of Mary Hitchcock Hospital in Hanover, N. H.

Mrs. Gertrude B. Craig, former Battell house director, becomes supervisor of men's dormitories on the resignation of Mrs. Janet Kingsley, married Sept. 6 to Dr. Philip E. Mellen.

Mrs. Edith Waterman Waldron, '32, formerly secretary to the French department, succeeds Mrs. Pamela Powell as secretary to the President. Mrs. Powell is now secretary to the headmaster of the Holderness School in Plymouth, N. H.

Eleonor Weiland, '39, becomes secretary at the Chateau and house director of Battell Cottage.

Martha Arnold, '38, has been made assistant dietitian in charge of Hepburn Commons and will assist in Home Economics.

Dean Womack heads the Military Service Council, with Professors Bowker and Green assisting in interpreting the kaleidoscopic shiftings of military information and requirements.

Help Wanted

Few women above the grade of moron today are unemployed against their will. But if we know our females, there are probably as many as usual who wish they were doing something else. Middlebury alumnae with this divine unrest will then be overjoyed to learn that the Women's College has established a Placement Office which will operate, without charge, on behalf of all its graduates and well-qualified non-graduates. Its organization is based on that of Mount Holyoke's most effective personnel bureau. The Office, under the direction of Marion Jones Munford, '32, stands ready to introduce the square peg to the square hole in all professional fields. Marion M. Wolcott, '25, newly appointed director of Forest Hall and Social Director of the Women's College, has taken over the vocational guidance of the undergraduate women.

Randall Hoffmann, '37, Assistant Director of Admissions, has been put in charge of the men's Placement Bureau. Teachers are therefore reminded that with the retirement of Professor Adams the Teachers' Appointment Bureau is dissolved as a separate entity and graduates queue up to the right or left, according to sex.

Rather than risk carrying outdated material over into the new setup, applicants are being asked to re-register with Mrs. Munford or Mr. Hoffmann. Registration blanks will be forwarded upon application. And everyone is urged to notify the offices of any positions they know to be open, in any field, thus helping Middlebury to help her graduates to help themselves.

Summer Science

Of the fifty-five men and five women who invested twelve summer weeks in the Middlebury Science Session, four-fifths received paying dividends. One man was drafted, four couldn't stick it out to the end, and seven failed either a semester or a year course. A low mortality, considering the intensive grind of five 90-minute classes a day and as much as fifteen hours of laboratory a week.

Eight seniors gained a semester lap on their degrees and expect to be graduated in December.

The survivors have turned in a majority report in favor of the intensified program, which they say brought a sense of accomplishment and improved their study habits. Except for the foreign languages floating through the open windows, there were few distractions. Both students and faculty enjoyed the change of pace provided by the diversified sports program, un inhibited by fraternity affiliations.

Loss

Within the last several months the College has suffered irreparable loss in the death of two women, neither an alumna, who by sharing their husbands' interest in Middlebury intensified and fructified that interest to the permanent benefit of the College.

Hattie Jane Dyer Weeks was for sixty-three years wife of the Hon. John E. Weeks, senior trustee and long-time chairman of the committee on buildings and grounds. In this capacity he had her beside him in his almost daily visits to the site of each new erection. Together they superintended the growth of Pearsons, McCullough, Chemistry, Mead Chapel, Hepburn, Porter Hospital, the Chateau, the two Library wings, Forest, Gifford, Munroe. . . . For thirty-three years she found time in the midst of her innumerable philanthropies to work with, and beside, her husband in building the Middlebury College of today. She was buried from Mead Chapel on July 16, with Dr. Thomas and the Rev. David W. Reid, '20, officiating.

The stamp of Mrs. James M. Gifford is concentrated in one building, though through the thirty-eight years in which her husband was a trustee her sympathy doubled his concern in his alma mater. The erection of Gifford Memorial Hall "in honor of my beloved husband" was the crowning satisfaction of a long life: almost immediately after its dedication in October 1940 she became bedridden. Her release came on September 16 in New York City.

Trustee

Percival Wilds, '02, trustee since 1916, died in New York City on June 14. He had been practising law there since his graduation from Harvard Law School in 1905, and held many offices of trust and honor. His duties on various trustee committees have been taken over by members of the Corporation, but no new appointment to the board has as yet been made.
Dr. Moody

Dr. Moody is now associate pastor of the First Presbyterian Church of New York City. The Church House is at 12 West 12th Street, or letters will reach him at the Grosvenor, 37 Fifth Avenue, where he and Mrs. Moody will reside.

Three times since his departure from the College on June 1 Dr. Moody has returned, and always to comfort and console those who in their sorrow turned instinctively to him. He officiated at the funeral services of Robert Post, '41, of Mary Fletcher Healy, '30, and of Ernest C. Bryant, '91.

Fraternité-Egalité

On behalf of the speed-up and campus solidarity, the fraternities have made the supreme sacrifice. By vote of the Interfraternity Council, "all rushing shall be confined to the four smokers" and the quota for each house is reduced from fifteen men to eleven.

Summer Languages

Beginning Portuguese, beginning Russian, were added to the offerings of the Middlebury Language Schools this summer past. Nine army officers were enrolled along with would-be translators and embassy clerks, business tycoons and traveling salesmen, language teachers and housewives, Civil Service and Intelligence employees, perennial scholars and undergraduates, repatriates and expatriates who longed to hear again the language of a country loved and lost.

To no one's surprise the Spanish School's enrollment increased by 60 per cent while the combined German, Italian, and French schools showed a 45 per cent decrease. The acute shortage of Spanish teachers for the high schools brought many students carried from French and Italian on the ebbing tide.

"The rapid growth of interest in Spanish is only in part a result of genuine professional need or of patriotic friendship for our neighbors in South America." We quote from Dr. Freeman's article on the Middlebury Language Schools in the New York Times of August 16, 1941. "It is in part a reaction from French and German, now in temporary disfavor, and in part a wave of popularity. It is now the gigantic task of true Spanish teachers throughout the country to transform this popularity into a genuine understanding of Spanish and Spanish-American culture, an intelligent sympathy with the attitudes and feelings of the South American citizen, and to create the basis for a lasting international cooperation."

With these practical objectives in view, the Spanish School organized its staff and courses. Six South American student fellows, from Bolivia, Venezuela, Peru, Chile, Colombia, and Uruguay, assisted in the school program, presided at dining tables, consulted with students. Special lecturers from Mexico and South America visited the school at frequent intervals, took part in the Inter-American Movement seminar directed by Richard Pattee of the state department. Don Fernando de los Rios, former ambassador of the Spanish Republic to the United States, gave a series of lectures on his recent tour of South America. The School sponsored a heavily elected course in beginning Portuguese, "remembering that Pan-American is not synonymous with Spanish-American."

The French School, enrollment reduced from 278 to 184, prepared for the needs of the future with the establishment of a Linguistic Training Center for post-war European reconstruction, a course in First Aid, highlighted a lecture on the methods and dangers of Nazi propaganda, raised funds to give the American Field Service a second ambulance.

The Italian School, which thanks to generous scholarship donors had lost only one student in the year, concentrated fervently on its glorious cultural heritage, on music and literature. The German School, suffering the unkindest cut of all, from 49 to 31, turned likewise to the literary masters of the past, to a splendid course in "Hausmusik" of the 18th and 19th centuries, to community concerts and the traditional folk dancing.

While the total registration of the foreign language schools remained at the approximate level of last year, 471-501, transportation difficulties and enrollments cut a cool hundred from the English School roster. The faithful, pre-eminently feminine, enjoyed one of the most ambitious programs in years, expanded to emphasize American literature, indigenous and derivative, augmented by a Schumann concert, three operas.

Four foreign scholars received honorary degrees at the Language Schools commencement: Don de los Rios, Dr. Castillo-Najera, Mexican ambassador
to the United States, Pierre de Lanux, and M. Andre Mayer, outstanding scientist and visiting French School lecturer.

**Body-building**

Spectator sports are practically out for the duration, as is leisure. Every student, freshman or senior, man or woman, is required to take three periods a week of physical education. Formal courses will be required as usual of freshman men and freshman and sophomore women, but the upperclass men will be given their preference of intercollegiate athletics, intramural sports, or physical training classes, while the women can fulfill the requirement through the department or the Women's Athletic Association. The men's program is divided into quarters—from Sept. 10 to Nov. 14, to Dec. 18, to March 10, to April 21—and the women's into three equal periods.

Intercollegiate meets are scheduled in all the usual men's sports except baseball, although the spring track meets may be only sloshings through the thawing clay. There will also be junior varsities to keep the second strings active, but the emphasis will be on two things, conditioning and the T formation. The squad is larger, heavier, and the women's into three equal periods.

Intersports will be instituted in the third quarter. Since the Women's College classes will be instituted in the third quarter, the third period will be given to the Women's Athletic Association. The men's program is divided into quarters—from Sept. 10 to Nov. 14, to Dec. 18, to March 10, to April 21—and the women's into three equal periods.

The Panther football team this year has everything to gain, and nothing to lose. Outside experts say that Middlebury will remain in the doldrums, the likely underdog in all contests with the possible exception of Union and Vermont. Insiders are aware of other factors—Sam Guaraccia, the old Midd spirit, and a willing squad.

Coach Guaraccia, with the help of new line-coach Dick Field, has been working the boys hard—concentrating on two things, conditioning and the T formation. The squad is larger, heavier, and in better shape than any in the past several years. Nine lettermen, headed by senior center, have returned to the fold. With freshmen eligible, it was necessary to cut the large turn-out of 56 to a workable squad of 33 men. The reserves are two deep in all positions except center.

The probable starting line of Bishop and Harris, ends; Reuman and Boissevain, tackles; Adsit and Colyer, guards; and Buksta, center, will average 185 pounds and 6' 1 1/4". Art Pepin, regular end, is temporarily laid up with a badly twisted ankle, but will probably be back in the starting line-up before the season is over. Don Gale, last year a letterman at guard, should see action as a tackle. Buksta is the only freshman on the starting team.

The backfield will be sparked by three juniors: Bob Sheehan, the team's outstanding broken-field runner and its most reliable passer, Holly Hollister, 200-pound fullback who handles the punting and is noted for his coffin corner kicks, and dynamic Johnny Urban.

**Publication**

Termites are slowly nibbling away the log cabin workshop of the Bread Loaf Printers and "conditions" as relentlessly undermine the financial structure of the Middlebury College Press. Despite these odds, another volume was added this summer to the Press publications—*Time Is Our House* by Louise McNeill.

With an introduction by Norman Foerster and four superb illustrations by Arthur K. D. Healy, the book contains twenty-four poems which reflect the gradual change of the American temperament in the past three years from serenity to uneasy acceptance to brooding resentment to whole-hearted anger, and, reading the future, to serenity again.

Miss McNeill was the Atlantic prize-winner at Bread Loaf in 1918. Harcourt, Brace published her Gauley Mountain the next year, and her verses have frequently appeared since 1915 in the literary magazines and slicks. Six in the Middlebury collection are reprinted from the Atlantic.

As the third volume in the Bread Loaf Poets Series of limited editions hand set and printed by the Bread Loaf Printers, the book is similar in format to *Only on the West Wind and Orphans* and *The Moon Craters*. In contrast to the quaker grey cover is the rich burgundy of the front and back covers, the same color repeated on the title page. But it's the poems that matter. We think they're wonderful. Publication date: Oct. 1. Price: $1.25.

*At Home*
As the Year Begins

By Stephen A. Freeman

Middlebury College is entering upon a year of crisis. No one can say what effect the many demands of the national emergency will have upon the college, even before the end of the present year. We must face the prospect that all students over 18 years of age will be drafted; that members of the faculty, especially in the technical subjects, will be requisitioned; that greatly increased taxes will make new problems for students and college alike.

Yet it is the duty of the college to devote itself entirely to the service of our country. We dare not attempt a program of "education as usual." Our students have realized clearly that the old leisurely, comfortable pattern of college life is completely gone. We are urging every physically fit and recommendable male student to join at once some one of the reserve corps here at Middlebury. Our training programs are approved and our assigned quotas in the army and navy and air programs will provide a place for nearly every qualified student. Even though the college is unable to hold them beyond the year of their draft age, we shall do our best for their training while they are here.

The women students also have their place in our war program. The increasing shortage of skilled manpower is drawing women in to replace men in practically every field. Many of them are now specializing in the technical subjects; others are planning to teach because of the critical shortage of teachers; still others are taking courses in home nursing, playground supervision, public hygiene, and laboratory techniques.

All possible guidance and help will be given to all our students. We have organized a Military Service Council for the men, and a Council on War Service Opportunities for the women. Both these councils have as their duty to gather and coordinate all pertinent information, to consult with individuals, and advise them about the best opportunities and the requisite training. A reading room has been arranged, with large quantities of printed information, and a faculty member is present to hold conferences at stated hours.

Every detail of our college life is being focused on the dual but inseparable purpose—of fitting young men and women to give their maximum service in winning this war, and in creating a stable peace thereafter. We insist on the duality of the purpose. We must win the war, but we must not thereby sacrifice the civilization and the culture for which we are fighting. Far too many hysterical advisers and false prophets are urging our youth to fill their entire college program with war training courses. Some day this war will be over. We must not allow this present generation of students to return to a peace-time world, their life career sabotaged, their real talents untrained, their best service to civilization spoiled by our shortsightedness. So we are saying to them, proceed with your long-run plan for your life, but make a place in your program for doing your duty in the present emergency.

Difficult adjustments are already being made by the students with the flexibility and the loyalty of youth. A streamlined and crowded schedule is accepted by them without a murmur. The Inter-fraternity Council has abolished organized rushing, in order to save time for studies. Economies of time and money are effected in the social activities. The sports program is viewed as having a new and more definite objective.

We plan to meet the students on a mature and democratic basis of mutual understanding and cooperation. I have assured to them the utmost possible information on all matters that concern them; they will have a free and unobstructed voice in the expression of their considered opinion. The frank statement of differences of view will be welcomed. Not that they expect to have the college turned over to their control, but I believe that they are able to justify authority which may be delegated to them, by the complete acceptance of the responsibility which goes with it. One can easily sense on the campus a seriousness of purpose, a responsibility, and an eagerness to cooperate, which give me great faith in our united ability to make this year, in spite of all difficulties, a year of great intellectual and spiritual growth.

To you, our alumni, I send this word of faith and courage from the College. We shall try to make you proud of what your college is doing in the war effort. More than ever before, we need your confidence and your support. You can convince prospective students that even one year of college is worth-while, before they are drafted; and that Middlebury is the place to spend it. You can suggest worth-while openings where our students can put their training to the best use. We need your guidance, and the sense of solidarity with you, especially in these days when you (Continued on page 19)
What was the S.A.T.C.? That is a question that numberless people have asked. Probably most of the younger generation who are puzzled by the letters S.A.T.C. could reel off the names of a bewildering array of Government bureaus and overlapping administrative units that are now commonly referred to by a string of initials, but they bring back vivid memories to many Middlebury alumni of the vintage of 1918 and especially to the former members of the Students Army Training Corps.

Recent bulletins have reported the military modus operandi at Middlebury in 1942. Common knowledge are the accelerated schedule, summer science session, military emphasis in various courses, Navy V plans and Army Enlisted Reserves enabling students to enlist and stay in college until better prepared as officer material. But this makes the contrast with the procedure in 1918 the more interesting.

Little long-range planning had been done to utilize college men in World War I. Recruiting was a free-for-all with few holds barred. A recruiting party for the Navy's "mosquito fleet"—the converted private yachts that were to chase submarines from our shores—arrived on the Middlebury campus the day after war was declared in 1917 and immediately went into action in Hepburn Social Hall.

Excitement was at a high pitch and the recruiters proceeded to take advantage of it. These were some of the arguments: "Boys, here is your chance to get right into the war—no marching around for six months to a year in dusty training camps. We'll put you on to one of these boats and you'll be right in the war, and if a group of you—such as a fraternity—would like to go, we'll put you together on a boat. . . Besides, these boats are the safest place to be because they don't draw enough water to be hit by a torpedo."

The pressure for enlistments from college undergraduates had been such by the summer of 1918 that it was apparent that the colleges would be stripped of their students by fall and their facilities wasted unless something were done at once to utilize these potential reservoirs of officer material. In keeping with the general policy adopted by the Government, Middlebury College, on August 18, 1918, was approved by the Committee on Education and Special Training of the War Department for the institution of a unit of the Students Army Training Corps.

In anticipation of this action the college was requested early in the summer to select two members of the faculty and fourteen undergraduates who should receive two months training at Plattsburg with the understanding that they should return to Middlebury and assist in the military instruction of the members of the S.A.T.C. Professor Raymond McFarland and Assistant Professor Luther I. Bonney were selected from the faculty and the following undergraduates were chosen: Leon M. Adkins, '19, Roland C. Holbrook, '19, Howard W. Watson, '19, Haskins B. Canfield, '20, Harold D. Ellsworth, '20, Albert A. Houghton, '20, William A. Huggard, '20, Arthur G. Miesse, '20, Clesson W. Parker, '20, Stewart Ross, '20, Henry S. Thomas, '20, Harold D. Elmer, '21, John W. Mead, '21, and Raymond S. Noonan, '21.

The War Department, however, changed its plans as regards the return of all these men to Middlebury and thus Professor Bonney and Adkins, Holbrook, Watson, Parker, and Mead were assigned to other institutions. Professor McFarland returned to Middlebury as Personnel Adjutant. The undergraduates who returned rendered a great service in organizing and drilling the candidates for the S.A.T.C. previous to the arrival of the officers and served with much credit as non-commissioned officers after the organization of the unit.

The War Department, however, changed its plans as regards the return of all these men to Middlebury and thus Professor Bonney and Adkins, Holbrook, Watson, Parker, and Mead were assigned to other institutions. Professor McFarland returned to Middlebury as Personnel Adjutant. The undergraduates who returned rendered a great service in organizing and drilling the candidates for the S.A.T.C. previous to the arrival of the officers and served with much credit as non-commissioned officers after the organization of the unit.

In accordance with the regular calendar, registration began on September 16 and the first exercises were held September 19, though the S.A.T.C. was not officially organized until October.

No one who has attended a college reunion or an alumni meeting in the past 30 years needs an introduction to "Cap" Wiley, '13, one-time Dean and now Alumni Secretary and Director of Admissions and Personnel for men. This article incorporates material he prepared with Prof. Davison directly after the Armistice. The illustration above is copied from that bulletin. The other photographs were wrenched from the scrapbook of Battalion Supply Sgt. Linwood (Goph) Law, '21.
The students who were candidates for the S.A.T.C. were required to pay a charge of $22 to cover tuition, board, room, etc., from the opening of college to October 1, when it was expected that the government would assume the burden.

The students had scarcely arrived before it was learned that several were ill with influenza. The house formerly occupied by the Delta Upsilon fraternity was engaged as an infirmary and an attempt made to isolate all cases there. In two days, however, twenty-six cases had developed and it became necessary to take over the Kappa Delta Rho fraternity house. This was soon filled and Hepburn Hall, too, became an infirmary. The college was placed under quarantine, college exercises were suspended, and a military guard maintained around the campus. Physicians and nurses were secured from near-by towns and cities and, under the able leadership of Dr. Stanton S. Eddy, '94, of Middlebury, they worked unceasingly for weeks. As a result of their untiring efforts all but two of the hundred or more who were ill made good recoveries.

The epidemic interfered seriously with the examination and induction of the men into the S.A.T.C. and owing to the quarantine the academic work was practically at a standstill during the greater part of October.

The coming of the S.A.T.C. necessitated many changes about the college plant. Hepburn Hall was commandeered as barracks for Company A and the officers' quarters were established on the first floor of that building. Hepburn Commons became Company A's mess hall; the chairs, table linen, silver, dishes, etc., were placed in storage and bare tables, benches, and army utensils took their places. Company B was quartered in Starr Hall where five men were assigned to each suite instead of the usual two. Hamlin Commons, which had been closed for the past few years, was reopened and fitted up as a mess hall for Company B.

The Army furnished cots, mattresses, and blankets for 300 men, the authorized strength of the unit. This equipment, however, did not arrive until some time after the students reached Middlebury and it became necessary to appeal to the local townfolk to open their homes to the men. Their response was most cordial and about 125 men were quartered in homes of the village until provision could be made for them on the hill.

The Battle of Middlebury

The S.A.T.C. curriculum was based on special programs specified by the War Department, as follows:

**PROGRAM A** (Infantry, Field Artillery, Heavy Coast Artillery)
- Military Instruction 11 hrs.
- Sanitation and Hygiene 9 hrs.
- War Issues 9 hrs.
- Topography and Map Making 12 hrs.
- Military Law and Practice 6 hrs.
- English 6 hrs.

**PROGRAM B** (Air Service)
- Military Instruction 11 hrs.
- Map Reading and Navigation 12 hrs.
- War Issues 9 hrs.
- Elementary Physics 12 hrs.
- Military Law and Practice 6 hrs.
- English 3 hrs.

**PROGRAM D** (Chemical Warfare Service)
- Students taking this course made out a special schedule in consultation with Professors Voter and Davis.

**PROGRAM E** (Transport Service and Truck Service)
- Military Instruction 11 hrs.
- Military Law and Practice 6 hrs.
- War Issues 18 hrs.
- Two Allied Subjects 18 hrs.

Each program called for a total of 53 hours' work per week, of which eleven were provided by military instruction and the remainder by academic courses, save in Program D, where a reduction of the hours of drill to six per week was made to permit the more intensive work called for by the chemical programs.

Instead of the customary college organization of men by classes taking their numerals from the year of graduation, the War Department put into operation a classification by ages, dividing them into three groups. The men 20 years old and over had the expectation of remaining in college for the first term; men of the age 19 class might expect to remain for two terms; and men of 18 years for three terms or the full year.

Seven per cent of the grades given the S.A.T.C. men were A's, 19 per cent B's, 21 per cent C's, 23 per cent D's, and 30 per cent were below passing. Their general average was 66 per cent.

News of the Armistice was announced at the chapel service on Monday morning, November 11, by Acting President Collins. Classes were suspended for the remainder of the day, and at half-past two the whole College assembled in the Mead Memorial Chapel to celebrate with appropriate exercises the conclusion of the Great War.

A series of rapidly changing orders from the War Department followed the signing of the Armistice and the uncertainty of the situation and lack of further incentive soon robbed the student soldiers of their enthusiasm. The order for prompt demobilization was finally received with great satisfaction on the part of nearly everyone and the discharge of the men was completed on December 12.

The task of reorganization after the S.A.T.C. period was a difficult one for the College, as many of the students who had come under the exigencies of the war situation and the impending draft were either not financially able or not scholastically prepared for, or interested in, pursuing a regulation liberal arts course. The bulletin prepared by Professor Wilfred E. Davison, '13, and me in December, 1918, and from which my memory has been refreshed, referred to this group as follows: "Only about 40 per cent of the S.A.T.C. students at Middlebury were clearly well fitted for college. Many were not only not prepared but were not of a sort to benefit either themselves or the institution by a prolonged stay."

So, when the new semester started on January first there were 99 veterans out of the 294 who fought the battle of Middlebury to carry on toward a college degree.

In my opinion the S.A.T.C. plan never really had a chance, for it was discontinued before its faults could be corrected. The military officers were a bit inclined to think their part of the training the most important, and the faculty to resent interference with classroom routine. The general impression today in Army and academic circles is not favorable to another such experiment. We hope that the plans for utilizing college men in World War II may prove more effective now and more acceptable in retrospect.
ON THE FIRST rainy day of May, 1941, a scientific conference in Worcester, Mass., was told that the coming summer and probably the growing season of 1942 would be marked by a shortage of water for crops in New England. Later that month the rash prediction was printed in a scientific journal. By the end of the summer the drought effects were serious and record lows of rainfall had appeared in the official records for 1941. The autumn brought little rain and the winter saw too little snow for good skiing. Springs were dry and reservoirs low.

To his gardener friends, and in the course of planning some field work for the month of April, the minor prophet insisted that we would have an unusually early spring because of the water shortage. The leaves and flowers appeared ten days ahead of normal and the dust blew in April. By this time it seemed selfish not to warn the growers of crops that another drought was probable; so the bald prophecy, worded in non-scientific terms, was printed in a few newspapers with emphasis on 1942. Fortunately for the reputation of the prophet, the Weather Bureau told the news syndicates that the item violated the rules of censorship. Within a week it was raining almost daily, the ground filled fast and the crops appear to have grown well. Yet the lakes, streams, and springs are low this August and the season's rainfall is only average in spite of many showers.

The basis for the prediction of more than a year of drought was a combination of mathematics and botany. A student of plants measured the width of each annual ring of wood from scores of old trees, many over 300 years of age when cut. A study of the measurements, made by Dr. C. G. Abbot of Washington, D.C., in 1936, indicated cycles of 23 and 46 years in the growth rates of the trees. The longer cycle is more pronounced and a chance to test its reliability first came in 1941. If the growth rates of plants in New England really follow an apparent cycle repeated eight times since 1544, there would be a very narrow ring of wood in pines and hemlocks for both 1941 and 1942. By previous comparison between crops, growth of trees, and rainfall, a drought was predictable if the cycle is real. Long-range forecasting was either in sight or a mirage.

The result is favorable to the theory of cycles in spite of the normal rainfall this year. It appears now that the cycle is not exactly 23 or 46 years; the double drought that came in 1918-19, 1895-96, 1872-73 and 1849-50 fortunately did not connect with the two growing seasons this time. It ran well over 12 months but failed to reach the critical month of June this year. As a long period of low rainfall, it appears every 23 years and gives a notable drought every 46 years, usually for two growing seasons.

Let's not call it a prediction this time, but the theory foresees good crops for the years just ahead with the exception of 1945 or 1946, the return date for the drought cycle of 1923, 1900, 1877 and 1854. By 1950 we should know if New England's famous climate does repeat itself in any way, subject to enough variations to keep life interesting.

For solving certain problems of dates from the past, the tree rings can be used with more confidence because the theory has become established fact. For example, suppose you owned the oldest log cabin in your state and wanted to prove the date of its erection. If someone had measured the ring widths of several trees [Continued on page 19]
Women in Sports

By Mary S. Rosevear

Physical fitness! How often one runs across this term today and what a pity that war must come to a nation to make it realize its importance. Middlebury girls, whether they know it or not, have always done much to keep themselves physically fit.

The physical education program of the Women's College has always emphasized sports rather than formal calisthenics, thus inviting voluntary participation. That this aim has been successful is proved by a survey of the work of the year 1941-42. In this survey of all sports offered through the Women's Athletic Association as well as of those directly under the department, it has been shown that out of 378 women in college, 300 participated in at least one activity. Of those who took no part in the W.A.A. sports, 64 were freshmen or sophomores, taking three hours of physical education per week. There were therefore only 14 women, mostly seniors, in the entire student body, who were doing nothing in athletics.

The survey also brings out some data on the popularity of various sports. As one might expect at a college situated as Middlebury is, skiing ranked first with 105 participating. Next came field hockey with 86. This is interesting because hockey is strictly a team sport and one with practically no so-called "carry-over" value like the individual sports. Then in order of popularity came volleyball, 82; bowling, 76; basketball, 74; skating, 63; badminton, 54; tennis, 52; soft ball, 29; soccer, 19; and riding, 18; archery, 10.

Statistics are dull unless we consider the underlying reasons. Skiing, our ranking sport, has much to give in Middlebury. It is practically our newest individual sport. Expensive? Yes. But think how becoming ski clothes are, and the glorious feeling of skimming over the snow at great speed! Tryouts for the Ski Team are held as early as snow and weather conditions permit and ten women are chosen for the squad. From this squad the women are selected to enter the various ski meets to which we are invited. It is generally planned to attend three meets away from home and the one at Winter Carnival. Competition is held on individual basis and each member of the squad is given an opportunity to enter a meet. There is no intensive coaching but a great deal of enjoyment is obtained from the trips to the Snow Bowl in Bunny Moore's station wagon for practice. Many others ski nearer home and the first Women's Ski Meet for members of the Women's College was held at Chipman Hill at the end of last year's winter season.

Due to the intense interest in hockey, soccer, which has been added to the fall program, has not attracted a great many. It has, however, proved its worth and the members of the red and blue squads make up in enthusiasm what they may lack in numbers.

Lessons in figure skating proved popular last year and it is no longer necessary to go outside the college for fancy skaters to take part in Winter Carnival.

Bowling at Buddy's came into its own and the season ended with a tournament in which 56 participated in spite of the fact that the badminton tournament with 55 entries was going on at the same time. Mixed bowling and mixed badminton are increasing each year and with the emphasis on co-recreation will fill a real need.

Modern dance at Middlebury is in its infancy but each year attracts more interest. The final production offered by the dance group in April was quite ambitious. Five scenes were presented from
Stephen Vincent Benet's "Listen to the People." The dancers were assisted by members of the Drama department who read passages from the poem. In December, twelve members of the University of Vermont were guests of Middlebury at a dance symposium held in Forest Recreation Hall. A supper was prepared and served by members of the Dance Club. In April, Middlebury journeyed to Burlington for an afternoon of dance as UVM's guests at the annual W.A.A. banquet that evening. These meetings with their exchange of ideas are most helpful and stimulating.

Another activity which is proving more and more popular is week-ending at the Marion L. Young Memorial Cabin in Ripton. Every Saturday, Bunny Moore's station wagon can be seen loading up in front of one of the dormitories ready for the twelve-mile trip up the gorge. No day is too cold and chopping ice at the spring to get water is a regular procedure. One party occupied the cabin over the weekend of Winter Carnival and took in all the events at the Snow Bowl from there. To be sure of the use of the cabin, early registration is necessary.

Fencing and squash were added to the sport's program last year. The fencers finished their season with exhibition bouts. Approximately fifty invited guests were interested spectators and the fencers received congratulations while tea and cookies were served. Dues to the very inadequate courts, only a few became acquainted with squash. The program last year. The fencers finished their season with exhibition bouts. Approximately fifty invited guests were interested spectators and the fencers received congratulations while tea and cookies were served. Due to the very inadequate courts, only a few became acquainted with squash. The men's handball courts are also the squash courts.

New equipment at the gymnasium includes an indoor archery curtain and a Battle Board Tennis outfit. The curtain allows the archers to laugh when the north wind sweeps down across the athletic field and tennis enthusiasts can keep in form playing Battle Board Tennis, a real tennis game.

The "good old gym" is still the center of activity during the long indoor season. New cupboards have been built in every conceivable spot but the fact remains that a space 28x18 feet is all that the women can call their own. In spite of this, the usual comprehensive program will be offered again this year. The freshman and sophomore schedule will remain the same while juniors and seniors can meet the new three-hour per week requirement through activity courses given by the department or through sports under the W.A.A. In keeping with the times, the Red Cross Standard Course in First Aid is required of all freshmen and Advanced First Aid, Home Nursing, Nutrition and Public Health are given in the department.

Since this article was written, the fall sports season has got into full swing. Once the enrollment was completed it became obvious that the single playfield on the women's campus could not accommodate the activities. Accordingly a long and narrow portion of the flatlands in front of the Château and to the right of the original field has been rolled and marked, providing a practice ground for the large classes in field hockey, soccer, and archery. If the compulsory requirement continues in effect, another year may see the area plowed, graded, and extended to regulation size.

Under the new system, hockey is even more firmly entrenched as the favorite fall sport with 141 participating. Ninety-nine racquettes have put tennis into second place. Soccer, 45, archery, 41, and hiking, 39, indicate the catholicity of taste, instinctive or acquired of necessity. Horseback riding, the most expensive activity, has 22 devotees, and eight are combining exercise with sightseeing in bicycling.

For hiking and biking, the newest credit-gaining activities in the curriculum, the department has posted a map of Middlebury and its environs, indicating round-trip routes to sites of interest. The hikers must cover at least three miles an hour, or nine miles a week; the bikers' mileage is adjusted to the contours of the road they travel.

The remaining six women not enrolled in the above sports are resting—and to the department intelligent and controlled passivity is as much a part of physical education as activity. Recovering from recent illnesses, they must rest their full three periods and check regularly with the department on their progress. Eventually, too, will join the program of all-out participation based on the principle of perfection in physique, posture, and poise.

Middlebury vs. Chandler

FROM THE ORIGINAL MANUSCRIPT COURT RECORDS

STATE OF VERMONT, To any Sheriff or Constable in
Addison County, ss. Greeting.

BY THE AUTHORITY OF THE STATE OF VERMONT,
You are hereby commanded to ATTACH the goods, chattels, or
state of Lyman A. Chandler of Granville in
the State of New York otherwise
of Middlebury in the county of Addison to the value of
three hundred dollars, and him notify thereof according
to law; and for want thereof take the body of the said
Lyman A. Chandler if he may be found within your precinct,
and him safely keep, so that you have before the County
Court, next to be holden at Middlebury within and for
the said county of Addison on the second Tuesday of
December A.D. 1841, then and there in said court to an'
swer unto The President & Fellows of Middlebury
College a body corporate established at
said Middlebury by act of the Legislature
of the State of Vermont

in a plea that the defendant render to plaintiffs the sum of
three hundred dollars, which the plaintiffs say is
justly due from the defendant to balance Book Accounts
between them, as by the plaintiff's original book, ready to
be produced in court, may appear. Now the plaintiffs say
that the defendant though often requested, hath ever refused
and still doth refuse to settle and adjust the account of the
plaintiffs or pay the balance thereupon due.

Which is to the damage of the plaintiffs as they say three
hundred dollars to recover which, with just cost, they bring
in a plea that the defendant render to plaintiffs the sum of
three hundred dollars, which the plaintiffs say is
justly due from the defendant to balance Book Accounts
between them, as by the plaintiff's original book, ready to
be produced in court, may appear. Now the plaintiffs say
that the defendant though often requested, hath ever refused
and still doth refuse to settle and adjust the account of the
plaintiffs or pay the balance thereupon due.

Which is to the damage of the plaintiffs as they say three
hundred dollars to recover which, with just cost, they bring
this suit.

HEREOF FAIL NOT—but of this writ, and of your doings
thereon, make due return according to law.

Dated at Middlebury in the county of Addison this 29th day
of July in the year of our Lord one thousand eight hundred
and forty one

Peter Starr recognized to the defendant
in the sum of sixty dollars as surety for costs of prosecution
as the law directs,

BEFORE ME, Saml. Swift Clerk

Addison County Court
The President & Fellows of Middlebury College
Lyman A. Chandler

Clarinda B. Chandler of Granville in the County of Wash-
ington aforesaid being duly sworn deposeth and saith that
L. A. Chandler named in the title of the above cause is the
son of this Deponent and that he was Born on the 4th day
May in the year 1821 and when he was in his sixteenth year
in the Month of August in the year 1836 according her best
recollection and belief he the said L. A. Chandler was sent
by his father Charles Chandler to enter and become a student

or member of Middlebury College in the State of Vermont,
and in pursuance of the direction of his said father, the said
L. A. Chandler entered said College in the year 1836 aforesaid
as she has always understood and believes, and continued
a student in said College for the period of three years next
following as she also verily believes. And she further saith
that the time he, the said L. A. Chandler entered College and
afterwards while there pursuing his studies was sup-
ported and maintained by the said father, and she further
saith that at the time he the said L. A. Chandler entered
College as aforesaid and during all the period of his being a
member of said College he was and still is a minor under the
age of twenty one years. And this Deponent saith that she
knew of the father of said L. A. Chandler sending him money
& Clothing at various times while he was a member of
College as aforesaid.

Clarinda B. Chandler

State of New York
Washington County ss. At Granville in the County of Wash-
ington this Twenty fifth day of November 1841 Personally
appeared Clarinda B. Chandler and made oath that the fore
going deposition by her Subscribed contains the truth the
whole truth and nothing but the truth. Before me Robert W.
Oliphanne a Justice of the Peace

The above Deposition is taken at the request of L. A.
Chandler to be used in a cause to be heard and tried before
the County Court next to be holden at Middlebury within
and for the County of Addison and State of Vermont on the
Second Tuesday of December 1841 in which cause the
President & Fellows of Middlebury College are Plaintiffs
and L. A. Chandler is Defendant. The Deponent living more
than thirty miles from the place of trial is the cause of taking
this Deposition and the adverse party living more than thirty
miles from the place of Caption was not notified and did not
attend

Certified by Robert W. Oliphante Justice of the Peace

The within deposition of Clarinda B. Chandler was taken
and sealed up by Me.

Robert W. Oliphante Justice of the Peace

Middlebury College
Addison County Court, June
Lyman A. Chandler
vs
State of New York
vs
Washington County ss.
Seymour Esquire of Middlebury be appointed Auditor to
hear, examine and adjust the accounts of the parties and
make report thereof to this Court at their next term to be
held on the second Tuesday of December 1842.

Saml. Swift Clerk

To Lyman A. Chandler & the President and fellows of
Middlebury College:

Your are hereby notified that I will hear examine and
adjust the accounts of the parties at the office of Barber &

14
Wright in Middlebury on the 31st next at one o'clock P.M.
Dated at Middlebury Oct. 26, 1842
To my sheriff or constable in the State, to Serve and return.
Greeting:
Ozias Seymour Auditor

Middlebury College vs. Lyman A. Chandler

The undersigned auditor reports, that having duly notified the parties, he proceeded on the 10th day of June 1843, to audit and adjust the accounts between them. The Plffs presented the annexed account Marked, which is disallowed on the ground that Dft at the time said account accrued was a minor. The Dft presented no account. The auditor therefore reports no balance due to either party.

The account presented by the Plffs was for the quarter Bills of the Dft while a Student in college—including tuition room rent use of library repairs sweeping ringing the bell and lines.

It appeared on this trial that Dft became a member of Middlebury College in August 1836 Dft was then a minor & was sent by his Father & seenote at Close of report to join the College and was supported at the College by his Father until his Father's decease which took place in August 1837. The Dft continued a member of the College receiving instruction after the decease of his father until August 1838 & was furnished with the means for this (#1 See note at end of report) Support from the estate of his Father. In August 1838 Dft left the Town of Middlebury & did not after that time receive any instruction from the College officers tho he returned to Middlebury in May 1839 & continued there until August 1839 but on account of his examination not being satisfactory he was not permitted to resume his standing in his class. Dft never took a formal admission from the College, & it does not appear that he ever informed the officers of his intention to dissolve his connexion with the College. During the time Dft continued a member of the College money was frequently sent him from home to pay his ordinary expenses but no money was ever furnished him by his Father or from his Father's estate expressly to pay his College bills. Dft was 21 years of age on the 14th day of May 1842—he continued to receive instruction at the College for about one year after the decease of his Father—The President of the College had correspondence with the Father of Dft after Dft became a member of the College The President of the College was informed of the death of Dfts Father in the fall of 1837—Six or eight months before the commencement of his suit but before Dft came of age the Dft said to the treasurer of the College on being spoken to about his account that he would call upon the treasurer & settle the account & give his note. It did not appear that the Father of the Dft had ever assumed any express liability to the College or that the Dft brought any line from his Father at the time he came on to enter the College. It also appeared from Dfts Statement that what money he wanted was sent him from home after the decease of his Father while he continued to receive instruction at the College. It also appeared that Dft taught School while a member of the College and that he paid over to his Father the moneys he reed for teaching or the largest part of them.

Defts cost before auditor
For Dft from Poultney where he came into the State of Vermont thirty seven miles $1.85
of Dft one day .75
Deposition .79
Auditors Fees 3.00
$6.39

(Notes in handwriting of Ozias Seymour)
# It appeared on the trial before the auditor that the Father of the Dft resided in the State of New York at the time Dft was sent to join the college and continued to reside in the State of NY until the time of his decease.

2. The testimony of the Dft at the trial before the auditor & who was the only witness as to the means of support furnished from the estate of his father was in the following words "after my Fathers decease I was furnished with what money I asked for from home to pay my ordinary expenses but no money was furnished me expressly for the purpose of paying my College bills."

The above notes are added to report at the request of the Attorney for the Plffs and state facts which were found by me at the hearing of the case.

Milo L. Bennett Chief Judge

Will the Supreme Court reverse the "Decision of the Court"? Will Lyman Chandler have to pay the sum still due the President and Fellows of Middlebury College? Is a minor responsible for payment of his debts? Is a college education a "necessary of life"? Or anyway, was it in 1842? The answers will appear in the News Letter of December, 1842. Be sure the college has your correct address on file so you need not miss the thrilling conclusion of this True Story of Middlebury at the Bar.
BELIEVING as I do in Maeterlinck’s doctrine of the “immortality of influence,” I am inclined to question the value of any attempt to recapture in a net of words any shining spirit that has vanished before our earth-blind eyes. The influence of such a life is what counts; and in all the laboratories of men there are no methods, fortunately, by which a transcendent soul can be neatly checked and tabulated. The sword outwears its sheath; and a life, wisely and richly lived, reaches out to “the uncharted waters and unpathed shores” of the lives of others—far beyond a date that men write with childish assurance as death.

Nevertheless, the interest of others who wish to draw closer to a beloved teacher who was unknown to them is understandable. Knowing Professor Wright first as a teacher and then a friend, I must, of course, write as I knew him over more than a quarter of a century. He was a teacher and a man with many facets to his personality and mind. I did not grasp them all, and could not, for to some degree all of us seem to be strangers to our friends and loved ones.

The years have been many and long since my Middlebury days, and I have heard many noted interpreters of literature, but none has equalled—to me, anyway—Professor Wright’s gift of making the bleak pages of a textbook suddenly luminous. I entered college just as the dusk of the accursed German system of research in literature was casting its shadow over the academic landscape; by this method one took a poem apart as one would a gas engine. I insisted then as I insist now that one cannot discover the secret of a thrush’s song by counting its feathers. Whether Professor Wright agreed with me or not, I do not know; I do know that he proved in literature that the spirit giveth life. I can recall with exactness the very lines of poems and prose he read in the classroom thirty-six years ago, can feel again the old sense of new vistas opening as he read from Browning in the Old Chapel. I tried to follow then the trails he pointed out into what is good, true, and beautiful in the tremendous story of man’s hopes, despairs, faith and vision which we call literature; I and other students of his have sought in the years since to help others to find and follow some of those trails that lead mountainward—merely passing along, of course, his influence.

The gift of illumination of ideas is an attribute of few teachers, and one cannot uncover the source of such a gift—it lies too intricately woven in the eternal meshes of character. Friendship can muse on the problem, that’s about all. One can say that Professor Wright moved through literature with ease of the scholar in fields of thought that he loved and understood, and one has an item in the answer, but it is merely an item. There was his sense of humor, always tolerant and kind, with point yet utterly free from the ridicule and sarcasm so often characteristic of instructors who are deficient in vitamins if not in intellectual attainments. A blast of mine in the classroom to the end that I thought “one-third of Shakespeare’s plays were potboilers and trash” (I had been forced to pry the plays apart in high school) left me an open mark for the cynical thrust, but it never came. Because he was wise in the ways of men, he knew how to lift the mask from the face of hypocrisy, to uncover with a quiet word or gesture the corrosion in the outwardly brilliant idea, but his comments left no bitter tarnish. It has been said that “some teachers teach with what they know, some with what they are; great teachers teach with what they know and are.” The man and his knowledge made “Charlie Baker” the distinctive teacher he was.

Somehow, through inherit-[Continued on page 18]
Ernest Calvin Bryant
IN APPRECIATION
By Paul D. Moody

It has been said, very truly and profoundly, that no man has one virtue or one vice. Virtues and vices, like grapes, grow in clusters. This afternoon it is our purpose, briefly, to mention some of those qualities which endeared Ernest Bryant to us and made his life so uniquely successful in the highest sense and to see the relatedness of those qualities and how one grew out of another.

In 1937 when he reached his seventieth year—still so undiminished in his mental powers—still on the increase in his gifts—it was hoped that a way might be found to continue him in some active though less exacting relationship to the college that the college might have the benefit not only of his skill as a teacher but his wisdom and sympathy as an adviser. He categorically refused to consider any such thing and coupled his refusal with the strongest plea, almost a demand, that no recognition whatsoever be made of the termination of the longest period of active and effective teaching in the history of the college. He desired that forty-two years of brilliant teaching be passed over at Commencement with no word of praise or farewell. And on this he was adamant. It was his modesty which never allowed him to recognize himself for what he was. That is why we could not say before what it is such a relief to say now.

This modesty sprang from his standards—his high sense of duty. He was never satisfied, for his standards were so lofty that he could not be. The fault of many of us is that we fall into ruts, thinking we know all we need to know, content resting on our oars. Then we cease to grow. This was not true of Professor Bryant. He was to the end a seeker after knowledge, never satisfied—always growing. Because he was forever moving forward he drew never became proprietary with him and he could and did change his mind and would admit it freely.

It was these standards to which he held himself so rigorously that governed his relations with his students. He was both a student and a teacher in an exact and exacting science. And such was the training in accuracy in his classes that many a man who cared not a fig for physics elected his courses that he might have the benefit of the stern discipline of accuracy. Men did not so much elect physics as they elected Professor Bryant.

This passion for accuracy makes some men pedants. It did not in his case. The reason was his deep affection for his students. Some did not suspect this when they writhed under the searching probe of his questions, which dispelled the fog of indefiniteness which they had in a moment of laziness mistaken for a grasp of the subject. But it was because of his concern for them, that he could not let them leave the classroom with mistaken ideas or vague impressions. He said many times that his business was to teach students—not physics. Physics was merely the agency he used.

He was saved from pedantry by another trait, his love of beauty. If he could look at the stars through the telescope of the astronomer, he could also see them with the eye of a poet. He loved little children and the little children [Continued on page 19]
Middleberries

Pauline Rowland Lane, '16, had five minutes with her twin daughters, Dorothy and Katherine, last July before they were put aboard the exchange ship bound for Africa and contact with the Gripsholm and she was returned to a Japanese prison. Both Mr. and Mrs. Lane were refused release, according to the Herald Tribune of July 26, and Mr. Lane was not permitted to see his daughters at all.

When word of this discrimination against an alumna reached Middlebury, the wires between Vermont and Washington began to burn. As a consequence, trustees Weeks and Mead and former president Thomas, obtaining the offices of Vermont and Rhode Island congressmen, have received the assurance of the State department that the Japanese government promises to put Mr. and Mrs. Lane aboard the next exchange ship.

Mrs. Lane's first husband was William M. Sistaire, '15, a casualty of World War I; her father was the Rev. George M. Rowland, '83, and her mother, Helen Goodrich, '84. She was born in Japan and after an American education returned there to teach in private girls' schools and women's colleges. The two girls are with their grandmother Rowland in Auburndale, Mass.

Mary Louise Race, '39, is the first alumna, to our knowledge, to become a WAAC. She was inducted into the Army July 9 in Trenton, N. J., left for Des Moines, la., after teaching French and Latin in New York State high schools, and went into private girls' schools and women's colleges. These interests carried over into her training, where she specialized in mess management.

Meanwhile, Charity Mead Lafond, '33, whose husband is a sergeant in the state army recruiting and induction headquarters in Rutland, enlisted August 5, and began training for an officer's commission the second week in September. After teaching French and Latin in New York State high schools, Mrs. Lafond was for some time service representative and manager of the Bennington telephone office.

THE NUTRITION OF INFANTS AND CHILDREN

By George Scott Dow, '95, B.S., M.D.
Chapman and Grimes, 1942, $5.00.
Reviewed by Ida Virginia Gibson, B.S., M.A.
Assistant Professor of Home Economics

Dr. Scott has given us a scholarly and exhaustive work which deals with the nutrition of infants and children in all of its phases. He would not agree with those who say "tell me what you eat and I will tell you what you are," for he has shown that perfect nutrition can be achieved only through a balanced metabolism which depends upon hereditary and environmental factors as well as on the proper balancing of the child's diet. The book begins with the subject of heredity and ends with a discussion of environment with the section on foods between the two. It is a long book (758 pages) and contains an amazing amount of information on a variety of subjects presented in a variety of ways.

Interesting historical information helps to leaven an otherwise heavy and technical volume. The author contrasts old ideas with the new in his treatment of such subjects as heredity, environment, sanitation, hygiene, and food legislation. Nothing is omitted. He even touches upon the relation of irrigation, soil, sunlight, and plant conditions to nutrition. Especially valuable and interesting sections are those on allergy and anaphylaxis, acidosis and alkalinosis, immunity and diagnosis. There is a fascinating chapter on medicine which begins with a survey of the history of disease prevention and ends with a discussion of the effect of drugs on the cells.

The organization of material is baffling. For example, the discussion of vitamins may be found in the chapter on vegetables; an appropriate place for it to be sure, but there is a chapter on fruits and one on milk, either of which would be equally appropriate. The author's opinion about sugar in the diets of young children is interesting but one would not know where to locate it since that too is included in the chapter on vegetables. It comes as a complete and pleasant surprise to find near the end of the book (and in the chapter on fruit) a brief discussion of the foods and cookery of other nations with recipes for foreign dishes suitable for children.

In a work of this kind one should be able to look up information quickly. There is a table of contents, eleven pages long, which is too many to thumb through in order to find out what the author has to say about, for example, congenital diseases or mineral metabolism. An alphabetical index would be a valuable addition to this storehouse of varied and useful information.

Surely this book was not intended for the average parents of young children. Only the college bred and those with scientific training could understand much of it. Dr. Scott refers frequently to the problems and practices of the pediatrician for whom the book was obviously written. All doctors, nutritionists, teachers of biological sciences, and some parents will find it a valuable addition to their reference shelves.

Dr. Scott is Fellow of the New York Academy of Medicine, New York City, consulting pediatrician to the Lutheran Hospital, New York City, and to the Nassau Hospital, Mineola, Long Island, one-time pediatrician to the New York Lutheran, St. Mark's, the Willard-Parker, the Post-Graduate Hospital and Medical School, the Cornell, and St. Mary's out-patient department for infants and children.—Ed.

could be demanding and exacting but it was in the interest
dim with tears. Yet he was not mushily sentimental. He
fundamentally tender-hearted. We have seen his eyes so often
appropriate for this man we loved and honored.

With body frail and subject to a thousand perils, with
knowledge and understanding sufficient to solve but a
trifling portion of the mysteries that beat in upon his life,
with the universe of the far stars and the mighty sun
crushing him with its greatness, man would rise in majestic
self-assertion to the victory of the spirit over all things in
time and space.
Some of us still hold that faith.

ERNEST CALVIN BRYANT
[Continued from page 17]
on South Street loved him, nor did they think him stern.
He loved all things beautiful. He loved flowers and knew
where rare blooms hid themselves in the woods.
He liked—and it was a lovable foible of his—to think of
infinite life, Procrustean. But no one was ever more
fundamentally tender-hearted. We have seen his eyes so often
dim with tears. Yet he was not mushily sentimental. He
could be demanding and exacting but it was in the interest
of the students, in the interest of the Highest.

In Lord Crewe's biography of his father-in-law, the Earl
of Roseberry, he tells of the impression made on the great
statesman by one of his early teachers. Sir Henry Newbolt
sat under that same teacher and wrote a poem to express his
own indebtedness. After word came of Professor Bryant's
—(we do not like the word death)—let us say "final
graduation"—we reread the poem. I know no words more
appropriate for this man we loved and honored.

Beyond the book his teaching sped.
He left on whom he taught the trace
Of kinship with the deathless dead.

There is the word! "The deathless dead." For at the root
of Ernest Bryant's character, despite his science, his learn-
ing, was his devotion to One, "whom to know is life
eternal" and who said, "Whosoever liveth and believeth on
me shall never die."

RINGS AND DATES
[Continued from page 11]
or timbers from the same area and period of time, knowing
the exact dates of the outermost ring in each case, the year
of cutting the logs for your cabin could be determined
accurately by comparison of ring widths.
A problem of this kind is now being worked out for an
old dwelling at Gloucester, Mass. End sections of a few
of the logs have been cut and the rings measured, giving an
undated sequence of two hundred rings in the hemlock
timbers. The difficulty in dating the old home quickly lies
in the absence of any record for the growth rates of hem-
locks so near the coast and so long ago. It is known to date
from about 1660 but the old trees on Cape Ann have all
been cut and used in other buildings. The recovery, sampling,
and measurement of rings in their timbers is limited by the
rate at which these barns, houses, and docks collapse from
old age.

Another type of structure for which the date of erection
can be determined closely by this process of "cross-dating"
is the old wooden bridge. The first case solved for New
England was at Wolfeboro, N. H., where analysis of the
buried pine foundations showed a date of 1806 for the
outer rings in the timbers. The old "Shaker Bridge" over
Massabesic Lake at Enfield, N. H., was found in the same way
to have been built after the growing season of 1848, a likely
date with some confirmation.

The Pulp Mill bridge at Middlebury is another and more
interesting case to which the cross-dating method will be
applied as soon as the world of travel returns to normal.
When Herbert W. Congdon published his new book on the
history and architecture of Vermont's covered bridges, he
could not set a date for this fine old double-lane bridge al-
though he believes it to be the oldest wooden span left in
the state. The probable date is between 1809 and 1828 but
we would like the exact year. In spite of exhaustive search,
it has not been found in any written records left of that
period, though perhaps some old diary of an early Midd
graduate mentions driving or walking through it, even before
the days of co-education.

When the Vermont Legislature of 1808 authorized the
Waltham Turnpike Co. to establish a toll-bridge over the
Otter Creek, it made the proviso that the Vergennes company
replace the rickety bridge there. From the Burr-arch con-
struction of the original hewn timbers, Mr. Congdon con-
cludes that the new one was built soon after and at con-
siderable expense. All the town and business records of the
time are lost so the Pulp Mill bridge stands as a challenge to
a new science as well as a monument to the old. The original
frame will probably give a datable series of tree rings if only
they can be exposed and measured without disturbing a
famous Middlebury landmark that has certainly known and
kept secret many other rings and dates of later years.

AS THE YEAR BEGINS
[Continued from page 7]
cannot visit the college so often. We shall try to keep you
informed of the rapid course of events here, and of the pro-
gress we make in meeting our problems. We count more than
you may realize on your interest and your continuing loyalty.

The whole state of Vermont shares in Middlebury's loss
of Alan Carter, ordered to Fort Meade, Md. October 12
as captain in the army specialists corps. Maestro Carter
organized the unique Vermont Symphony Orchestra in
1937, since 1939 has enriched campus life with both baton
and violin.
Alumni News and Notes

1882
DEATHS: John C. Miller, at Boston, Mass., July 15.

1885
DEATHS: George P. MacGowan, Aug. 29.

1894
MARRIAGES: Dr. Stanton S. Eddy, Sr., to Mrs. Marjorie Kinter, at Burlington, Vt., June 16.

1895
Dr. John Barlow, member of the Rhode Island State College faculty since Jan. 1, 1902, will be retired as Dean Emeritus Nov. 28, upon attaining his 70th birthday.

1899
Annis M. Sturgis has retired from the Department of Education, Newton, Mass.; address: Centerville, Mass.

1900
ADDRESSES: Belle E. Wright, c/o Mrs. Stevens, 108 Buell St., Burlington, Vt.

1902

1904

1905
Frances H. Warner is teaching at Saint Mary's In-The-Mountains, Littleton, N.H.

1906
Mrs. G. M. Weld (Florence Duncan), is head of Talbot House, Smith College, Northampton, Mass.

ADDRESSES: Mr. and Mrs. Samuel L. Abbott (Inez Sweeney), Box 61, Bethel, Vt.; Mrs. H. B. Payne (Irene Henry), 1429 Dorothy Dr., Glendale, Calif.

1908
Hon. Samuel B. Pettengill has been appointed chairman of the Republican National Finance Committee.

1911

1912
MARRIAGES: Royal A. Wray to Mrs. Ruth S. Williams, at Liberty, N. Y., May 31.

ADDRESSES: Silas C. Goold, Shoreham, Vt.; John English, 167 Lloyd Ave., Providence, R. I.

1913
DEATHS: Mrs. Ralph W. Newton (Laurie Besiegel), Nov. 1941.

ADDRESSES: Ruby M. Vosburgh, 47 Sherbrooke St., Springfield, Mass.

1914
Helen Haugh is Head of the Department of Social Studies in the Crosby High School, Waterbury, Conn.

1916
William W. Thomas has been elected national commander of the Military Order of the Purple Heart.

Lucia Besiegel is an instructor in Latin in the Searles High School, Great Barrington, Mass.

1917
BIRTHS: A daughter, Elizabeth Dunning, to Mr. and Mrs. William H. Edmunds, June 25.

1918
Mrs. R. C. Axtell (Faith Walker) is attending special Government classes at Boston University; address: 8 Garrison St., Boston, Mass. Bertha Farrell is teaching in the Middlebury, Vt., High School.

ADDRESSES: Rev. Henry H. Chapman, 281 Fourth Ave., N.Y.C.; Mr. and Mrs. Irving W. Eastman (Christine Webster), 3064 West 155 St., Cleveland, O.

1920
Alan P. Furber has been elected president of the School of Practical Art, Boston, Mass.

ADDRESSES: John B. Todd, 5838 Phillip Ave., Chicago, Ill.; Mrs. John W. Klenck (Joan Beigebieg), 515 West 7th St., Plainfield, N.J.; Mrs. Forrest Nelson (Katharine Allen), 4 Collett St., Hamden, Conn.

1921
A. George Osceola is assistant headmaster of St. Paul's School, Garden City, L.I., N.Y.

1922
Milton L. Barnes has a Government position at the Submarine Base, New London, Conn.; address: 192 Monument St., Groton.

Mrs. Mildred MacAllister teaches science at the Springfield, Vt., High School; address: 18 Cedar St., Fair Haven.

ENGAGEMENTS: Robert H. Whitney to Natalie F. Whitworth, of Bridgeport, Conn.

1923
Mary E. Loughrey is an instructor at the Rhode Island College of Education; address: 19 Angell St., Providence.

ADDRESSES: Mrs. P. J. Hillers (Barbara Stilphen), 408 Elizabeth St., Ogdensburg, N.Y.; Mrs. A. S. Hunter (Dorothy Slayton), 2707 Baynard Blvd., Wilmington, Del.

1924
Herbert S. Courtis is manager of the W. T. Grant Co. store at 715 Market St., Chattanooga, Tenn.

ADDRESSES: Mrs. George D. Limont (Wilma Walsh), Dorset, Vt.; Mrs. Byron Spence (Beatrice Mills), 6209 Georgia St., Chattanooga, Tenn.

1925
Eleanor Sprague has gone with the N.Y. Hospital Unit.

Mrs. Edward S. Clark (Isobel Sutherland) is an assistant interviewer with the U.S. Employment Service; address: 15 Gran St., Oneonta, N.Y.

Marion M. Wolcott is the Social Director of the Women's College, Forest Hall, Middlebury, Vt.

Norman H. Polhemus has been elected president of the Home Cooperative Savings and Loan Assoc., Poughkeepsie, N.Y.

Melvin C. Livingston is superintendent of schools at Mechanicville, N.Y.

1926
Ruth Jackson has resigned as Young People's Worker and Parish Assistant of the First Presbyterian Church, Passaic, N.J.

E. Murray Hoyt is the author of a story appearing in the LADIES' HOME JOURNAL for Aug.

Frank Wittenberg is real estate broker with Edson and Edson, Inc., Greenwich, Conn.

1927
Mrs. Eric B. Carlson (Gunhild Ellstrom) has been appointed instructor in the Secretarial Division of the Fairfield School, Worcester, Mass.

ADDRESSES: Mrs. W. E. Herrlich (Marion Morgan), 1326 Fort Bragg Rd., Fayetteville, N. C.
1928

Louise Robinson is librarian at the Tower Hill School, Wilmington, Del.

Raymond F. Frinz is supervisor in the personnel department of the Prudential Ins. Co. of America, Newark, N. J.; address: Mt. Harmony Rd., Bernardsville, N. J.

BIRTHS: A son, Thomas Hance, to Mr. and Mrs. Donald H. Penn, May 27.

ADDRESSES: Mrs. Lynford Lardner (Adelma Hadley), 810 Milburn St., Evanston, Ill.; Ms. James Alan Daley (Anna Belisle), 1151 Willow Ave., Napa, Calif.; Ms. Virginia A. Bradley (Dorothy Beckett), 4376 Helen Ave., Grand View Hts., Lancaster, Pa.; Mrs. Vincent Clark (Mildred Badger), 90 Rose St., Waterbury, Conn.; Jane E. Carrick, 29 Dorset Rd., Waban, Mass.

1929

Henry E. Hunt was awarded a master's degree in education by the University of Vermont in May and is teaching mathematics and coaching winter sports at Pletron, Me., Academy.

Norman A. Stetthaber is mathematics teacher in the high school at Perth Amboy, N. J.

BIRTHS: A daughter, Polly Pierce, to Mr. and Mrs. Llewellyn Roberts, June 16; a son, Thaddeus Alwill to Mr. and Mrs. Thaddeus R. Jackson, Feb. 13, 1933; a daughter to Mr. and Mrs. John Malcolm Williams, Aug. 24; a daughter to Mr. and Mrs. Wallace Green (Evelyn Clement '32), Burton Wallace, to Lt. and Mrs. Burton S. Marsh, Oct. 30, 1941; a daughter to Mr. and Mrs. Jane E. Carrick, 29 Dorset Rd., Waban, Mass.

1930

Mrs. Charles S. Wallace (Eleanor Kocher) is a nurse at The Good Samaritan Hospital, Suffern, N. Y.

Alice Guest has a teaching fellowship in English at Vanderbilt University, Nashville, Tenn.

MARRIAGES: Eleanor Kocher to Charles S. Wallace; address: Box 111, Suffern, N. Y.

BIRTHS: A son, William Anton, to Mr. and Mrs. Anton Sوردrin (Aline Buck), June 19, 1941; a son, Frank Theodore, to Mr. and Mrs. Theodore Zaremba (Beatrice Lindgren '37), July 27; a son, Burton Wallace, to Lt. and Mrs. Burton S. Marsh, Oct. 30, 1941; a daughter to Mr. and Mrs. Wallace Green (Evelyn Clement '32); at Burlington, Vt., in May.

DEATHS: Mrs. Arthur K. Healy (Mary Fletcher), Aug. 12.

ADDRESSES: Elizabeth Norman, 222 East 61st St., N. Y. C.; Mrs. Robert C. Mansfield (Mary Bowditch), 164 Bradley St., Portland, Me.

1931

Harold Bergman has been appointed information officer in charge of Vt. and N. H. for the Division of Information, Office for Emergency Management, Headquarters in the Pavilion Hotel, Montpelier, Vt. Alden C. Utton is N.Y.A. educational advisor at The Little River Project, Waterbury, Vt.

BIRTHS: A son, Robert William, to Mr. and Mrs. Robert G. Spencer, at Jersey City, N. J., May 28; a son, Robert Henry, to Mr. and Mrs. George E. Foote, July 24.

ADDRESSES: Bernard B. Finnin, 605 N. Notre Dame Ave., South Bend, Ind.; Mrs. Allen E. Parker (Alice Hoywood), 49 Holman Ave., Shrewsbury, Mass.; Mrs. Roderic Cross (Esther Rushlow), Sept. 27, 1941; address: Hq. A.F.R.T.C., Fort Knox, Ky.

1932

Richard H. Berry is assistant manager at Plattsburg, N. Y., for the Metropolitan Life Ins. Co., address: 13 Normal Ave.

A. Kirkland Sloper is regional training director of the National Youth Administration, Columbus, O.; address: 55 Highland Ave., Cambridge, Mass.

Frederick W. Hayward is an investigator in chemistry at the N. Y. State Agricultural Experiment Station, Geneva; address: 55 Highland Ave., Geneva, N. Y.

Robert A. Bakeman is a social worker for the Denver, Colo., Bureau of Public Welfare; address: 128 East 8th Ave.

Ruth C. Adams is a public health nurse; address: 368 Riverway, Apr. 9, Boston, Mass.

Mrs. Walter Waldron (Estelle Waterman) is secretary to Acting President S. A. Freeman.

BIRTHS: A daughter, Nancy Josephine, to Dr. and Mrs. William Taggart (Josephine Saunders), April 11; address: 4 MaGruder Hts., Williamsburg, Va.

1933

Janet N. Schilling is a social worker; address: 64 Garden St., Hartford, Conn.

Rev. Frederick W. Brink has received the degree of Doctor of Sacred Theology from Temple University and has begun work Sept. 1 as Presbyterian University Pastor at Ithaca, N. Y., working on the cases of Cornell University and Ithaca College; address: 221 Eddy St., Ithaca.

Proctor M. Lovell is with the Agfa Anso, Division of General Analyse and Film Corp.; address: 147 Crazy Ave., Binghamton, N. Y.

Wendy L. Eno is teaching French at Brown University, Providence, R. I., and is also an assistant professor of bacteriology at Rhode Island State College.

Kingsley R. Smith is with Jones and Lamson Machine Co., Spring- field, Vt.

Lyle E. Glazier is an instructor at Tufts College, Medford, Mass.

William S. Weir has been appointed to the position of Assistant Editor of Publications of the Advertising & Publications Department of the Prudential Life Ins. Co., Newark, N. J.; he has also been awarded the C. L. degree by the American College of Life Underwriters.

Anthony G. L. Brackett is principal of the Westminster, Mass., Academy.

MARRIAGES: Faith Kellogg to Howard C. Dailey, Aug. 22.

BIRTHS: A son, Dennis David, to Mr. and Mrs. Lawrence Hammer (Bertha McKenzie), May 3; a son, Wulf, to Mr. and Mrs. Willy Hecker (Elly Dels), Nov. 1940; address: Hamburg-Pulsbüttel, Kohlgarten 3, Germany; a daughter, Marilyn Edith, to Mr. and Mrs. Melvin H. Glazier (Bernice Cooke '34), March 9; address: Bedford Springs, Bedford, Mass.

ADDRESSES: Mrs. Gelin Stur (Julia Sitterly), Stuyvesant Ave., Rye, N. Y.; Mr. and Mrs. Lyle Glazier (Amy Niles), 11 Irving St. W. Medford, Mass.; Dr. Edward J. Fairbanks, 9 Willard Ave., Worcester, Mass., Dr. and Mrs. Philip Carpenter (Helen Easton), Kingston, R. I.; Mr. and Mrs. Kingsley R. Smith (Virginia Coley '32), 59 Elm St., Springfield, Vt.

1934

Travis E. Harris is teaching English at Culver, Ind., Military Academy.

Madison J. Manchester is with Simmons Aerocessories, Inc., 10 Rockefeller Plaza, N. Y. C.

Mhelpe S. Weirt, Jr., is manager of the Sears, Roebuck and Co. store in Glen Falls, N. Y.

MARRIAGES: Gertrude M. Hewitt to Earl P. Lathrop at Bristol, Vt., Aug., 9; address: The Copper Kettle, Farmington, Conn.

Eugene G. Embler to Inger S. Olsen, of Newburgh, N. Y., July 5; address: 102 East St., N. Attleboro, Mass.

George T. Schauz to Doris L. Evans, Wilkes-Barre, Pa., July 3.

BIRTHS: A daughter, Joan White, to Mr. and Mrs. Fielding Taylor, Jr. (Clara White), May 17; address: 144 13th Ave., San Mateo, Calif.; a son, Jonathan Shaw, to Mr. and Mrs. Robert H. Rickard, April 4; address: 102 East St., N. Attleboro, Mass.

ADDRESSES: Mr. and Mrs. Travis E. Harris (Margaret Leach '36), Culver Military Academy, Culver, Ind.; Mary E. Carrick, 29 Dorset Rd., Waban, Mass.; Mrs. Howard G. Langdon (Carolyn Stafford), 77 Beverly Rd., Wethersfield, Conn.; Winifred W. Bland, 30 South 22nd St., Philadelphia, Pa.

1935

MARRIAGES: Elizabeth Bryon to Lt. Everett H. Sheldon at W. Springsfield, Mass., June 27; address: 38 Crawn Ave., W. Springsfield, Otto W. Prochaska, Jr., to Marion Sersou, at N. C., May 16; address: 428 W. College Ave., State College, Pa.; Pauline E. ...
THE MIDDLEBURY COLLEGE NEWS LETTER

Wood to Lt. William A. Yasinski at Fair Haven, Vt., June 7; Carl W. Calkins to Frances G. Bradt, at Troy, N. Y., June 20.

BIRTHS: A son to Mr. and Mrs. Ernest E. Ahler (Ruth Damcrell), W. Calkins to Frances G. Bradt, at Troy, N. Y., June 20; Russell A. Clark, Jr., to Sarah W. Tilton, at Laconia, N. H., June 20; Norman F. Keffer to Elizabeth Jane Hall, at Glen Rock, N. J., June 20.

ADDRESS: Mrs. Robert B. Keegan (Cornelia Philips), 200 Main St., Farmington, Conn.

Phyllis Dow to Sergt. James Witt at Denver, Colo., June 19; Elizabeth Stratt to Robert E. Marshfield, H. N. Y., June 19; James R. McManus (Anne Stark), 227 C Langfield Dr., Buffalo, N. Y.; Mrs. Howard Cormier (Elizabeth Seeley), South St., Middlebury, Vt.; Mrs. David W. Cleverdon (Gertrude Knight), 37 Blake St., Westboro, Mass.; Mr. and Mrs. Theodore Packard (Marion Haven & Hartford Railroad in the N. Y. office.)

Wishart), Hanover, N. H., in April.

Jeanette L. Leavens is secretary to the area engineer at the Lake Ontario Ordnance Works, Lewiston, N. Y.; address: 214 Penhurst St., Rochester, N. Y.

Frances M. Russell, who is teaching American Literature at Woodmere, L. I., N. Y., High School, received in Aug. a Bachelor of Science Degree in Library Science.

Dr. E. Sherburne Lovell is now interning at the Beverly, Mass., Hospital.

MARRIAGES: Margaret C. Dow to Emerson N. Ludington, Aug. 2g. Marjorie M. Bulkeley to Arthur S. Malle.

BIRTHS: A son to Mr. and Mrs. Theodore Packard (Marion Haven & Hartford Railroad in the N. Y. office.)

Wagg, Inc.; address: 21 N. Ferry St., Schenectady, N. Y.

THE MIDDLEBURY COLLEGE NEWS LETTER
Published by Middlebury College at Middlebury, Vermont

Vol. xvii, No. 1
September, 1942

MILITARY SERVICE WHO’S WHO

The Middlebury men and women whose names appear on the following list represent those who have already entered training camps, taken battle stations, or mounted firing-steps. Some of these men are by now in the Far East and on the Pacific Ocean, in Europe and Africa. The list is tentative, and, of necessity, limited in information. We must withhold the location of those who have gone abroad, and doubtless some names have been unintentionally omitted. Names will be added as they become known to us, and the military grades will be altered as we learn of more recent promotions.

Alumni not in military service as well as those who are in service can aid the committee greatly, the former by forwarding the name and address of any soldier or sailor or marine, WAAC or WAVES or WAAF, whose name does not appear on this list, and the latter can help keep our record straight by giving us information about themselves.

Constructive suggestions from the alumni concerning how this committee can best help the Middlebury men and women in the service are always welcomed. And surely we would like to learn directly from those in the service what Middlebury news they most desire. All information should be sent to the War Service Committee, Alumni Office at Middlebury.

Almost constant change has made it impractical to include the military addresses of the men and women on this list. In consequence, the War Service Committee will gladly accept the responsibility of forwarding mail to the alumni in the service. These letters should be sent to the Alumni Office at 24 Old Chapel, and it is especially important that the Christmas mail be in the post early—the deadline is November first.

The War Service Committee is very grateful to the Alumni Office for its cooperation and to Miss Helen C. Aronson, ’36, for her painstaking work in compiling the list.

WAR SERVICE COMMITTEE

Mrs. Marion J. Munford, ’32
Dr. Philip E. Mellen, ’04
Randall W. Hoffmann, ’37
Reginald L. Cook, ’24, Chairman

1909

1911
Lt. Frederick A. Coates, Naval Reserve.

1912
Major Willys M. Monroe, Army, Medical Corps.
